

Plant Health Care (PHC) Monitoring Policy

[PHC](#) monitoring is a proactive approach uniquely tailored to the client's PHC needs and goals. By focusing on the early detection of [problems](#), more conservative and/or less expensive [solutions](#) can often be employed, should an issue be detected.

- All monitoring visits shall be conducted by an [ISA Certified Arborist®](#).
- The client shall determine the total number of visits per year by prior agreement. In most instances, RTS recommends at least two (2) visits per year.
- If on a biannual schedule, **March - April** and **August - September** visits are typically preferred in order to observe plants with and without foliage.
- After each visit, a brief summary of any adverse findings along with any recommended action items shall be sent to the client via email.
- The fee shall vary based on the size of the property being monitored, but typically ranges from **\$50.00 - \$100.00** per visit. However, the specific fee for each visit shall be set on an individual basis with the client's prior agreement.
- The client may cancel the monitoring visits at any time by notifying RTS in writing or via email.
